PROFESSIONAL SUMMARY

Software Engineering graduate and Full-Stack Developer experienced in developing responsive, database-backed web applications with React.js, JavaScript, TypeScript, C#, ASP.NET Core, EF Core, SQL Server, PostgreSQL, Supabase, and Node.js. Built authentication and authorization workflows, RESTful integrations, interactive user interfaces, and QA processes through internships and team projects. Familiar with SOLID principles, design patterns, Docker, and CI/CD workflows.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, SQL, Python, PHP
Frontend: React.js, React Hooks, React Router, Tailwind CSS, Bootstrap, HTML5, CSS3, Razor, AJAX, Vite, Motion
Backend & APIs: ASP.NET Core MVC/Web API, Node.js, REST APIs, Entity Framework Core, LINQ, Swagger/OpenAPI
Databases & Cloud: SQL Server, PostgreSQL, Supabase, MySQL, MongoDB, Supabase Auth, Row Level Security (RLS)
Security & Architecture: ASP.NET Core Identity, JWT, Cookie Authentication, RBAC, SOLID, Design Patterns, Clean/Onion Architecture
DevOps & Tools: Docker, Docker Compose, GitHub Actions/CI/CD, Git, GitHub, Jira, Postman, Visual Studio, VS Code
Testing & Methods: Unit, Integration, API, Security and Manual Testing, Agile/Scrum, Requirements Analysis

PROFESSIONAL EXPERIENCE

Full-Stack Development Intern | The Hope International | Jul 2026 – Sep 2026

- Developed a Moodle Excel Management System Dashboard for bulk student, course, teacher, and group administration using PHP, MySQL, and PhpSpreadsheet.
- Configured local application/database environments and validated key administrative workflows through functional and integration testing.

Full-Stack Development Intern | Dot Jordan | Jul 2026 – Sep 2026

- Contributed to an ongoing full-stack web application using React.js, JavaScript, Node.js, and MongoDB, including responsive UI and database integration.
- Used Git/GitHub for collaboration and supported debugging and frontend/backend workflow development.

PROJECTS

Unseen Jo – Tourism Discovery Platform | Web Application | 2026

- Developed a responsive tourism discovery platform and “Surprise Me” recommendation feature based on interests, budget, time, location, transportation, and group preferences.
- Implemented Supabase Auth, PostgreSQL relational data, and Row Level Security (RLS); integrated interactive maps and location-based exploration with React Leaflet/OpenStreetMap.
- Built reusable React/Tailwind components with animations; improved performance through lazy loading, route-based code splitting, and optimized images.

Technology: React.js, JavaScript, Tailwind CSS, Supabase, PostgreSQL, React Router, React Leaflet, Motion, Vite

Planora – Project Management System | Graduation Project | 2026

Team Leader & Full-Stack Developer | Requirements Analysis and UI/UX Design

- Developed a Scrum-based project management system with Sprint Backlog, Kanban board, tasks, and QA review workflows.
- Implemented role-based authorization with ASP.NET Core Identity, drag-and-drop task updates, AJAX, server-side validation, and QA Pass/Fail transitions.
- Performed unit, integration, and security testing of key system workflows.

Technology: C#, ASP.NET Core MVC, EF Core, SQL Server, Razor, JavaScript, AJAX

CaeloTerra – NASA Space Apps 2026 | In Development | 2026

- Designed a React and ASP.NET Core Web API decision-support application architecture using NASA POWER and GPM IMERG data for climate-resilient crop rotation.
- Designed multi-season rotation logic with farm and climate inputs, robustness scoring, and explainable recommendations.

EDUCATION & TRAINING

Bachelor of Science in Software Engineering | Middle East University, Jordan | 2022 – 2026
Training: ASP.NET and Oracle APEX – The Hope International; Agile, Scrum, and Waterfall – Middle East University

LANGUAGES

Arabic (Native) | English (Good Working Proficiency)
